

Electro Service (India)
An ISO 9001:2015 Company

TRANSFORMER

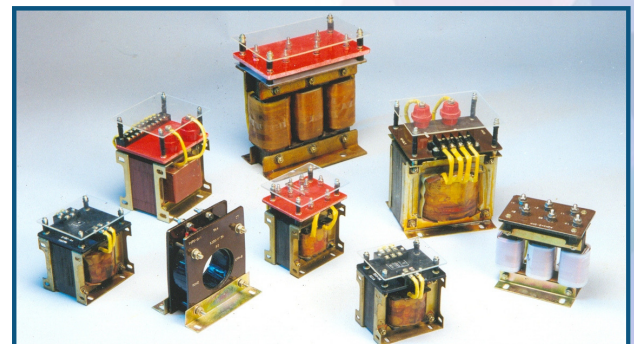

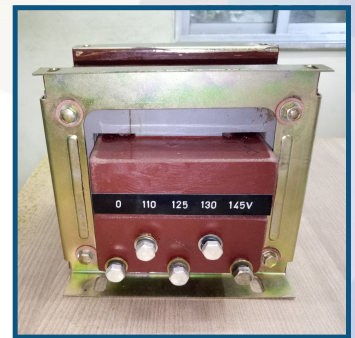

We design and manufacture dry type as well as cast resin transformer and choke for OEM as well as captive application.

OUR RANGE:

1. Control Transformer
2. Isolation Transformer
3. Lighting Transformer
4. Furnace Transformer
5. V-V Transformer
6. Magnet duty Transformer
7. Reactor for Drives
8. Auto Transformer for Starters
9. 3 Phase Choke
10. DC Filter Choke

OUR CAPACITY:

1. Up to 100KVA in 3 phase
2. Up to 25KVA in 1 phase
3. Up to 6.6KV in resin cast

"Quality Endures"

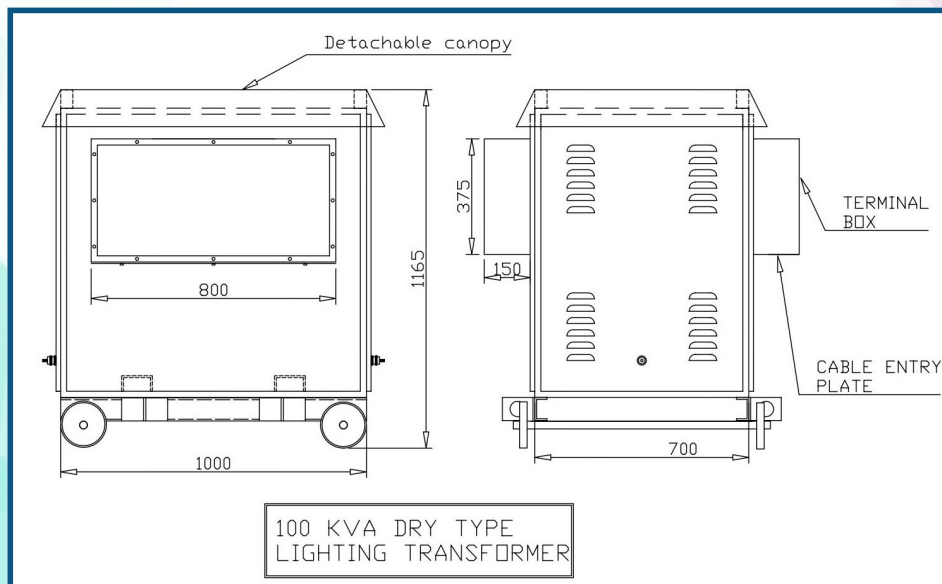

Warranty – Unconditional 12 months with life time service support

OUR COMMITMENTS:

1. All the transformers are designed for optimum cost to performance ratio.
2. Transformers are vacuum impregnated with class-F varnish.
3. Electrical grade copper strips are used with glass tape/nomex insulation for high current.
4. CRGO or high permeability electrical grade laminations are used as core material. Carefully interleaved laminations are rigidly secured with steel clamps and isolated through bolts. This results in lower core losses, lower excitation current and cooler, quieter operation.
5. Ductings are provided in large transformers for easy airflow within the coils for improved cooling.
6. Each and every transformer is routine tested as per IS2026 or IS6297 and manufacturer's routine test certificate is issued with every transformer.
